

July 22, 2026

Dear Customers,

We are aware of a water service interruption affecting customers on **Northshore Lane, Navigator Court, and Arapaho Road.**

The outage was caused by **Ziply Fiber**, whose contractor struck a District water main while installing fiber optic infrastructure.

District crews are currently en route to the site and will begin repairs as soon as they arrive. We will work as quickly as possible to restore water service safely and minimize the length of the outage.

For customers who need water while repairs are underway, the District has a **1,000-gallon potable water storage tank** available at the District office.

We appreciate your patience and understanding while repairs are underway. We will provide an update as soon as service has been restored.

Thank you,

Bayview Water & Sewer District
